

# The Name of the Title is Hope

BEN TROVATO\* and G.K.M. TOBIN\*, Institute for Clarity in Documentation  
LARS THØRVÄLD, The Thørväld Group, Iceland

A clear and well-documented  $\text{\LaTeX}$  document is presented as an article formatted for publication by ACM in a conference proceedings or journal publication. Based on the “acmart” document class, this article presents and explains many of the common variations, as well as many of the formatting elements an author may use in the preparation of the documentation of their work.

CCS Concepts: • **Computer systems organization** → **Embedded systems**; *Redundancy*; Robotics; • **Networks** → Network reliability.

Additional Key Words and Phrases: datasets, neural networks, gaze detection, text tagging

## ACM Reference Format:

Ben Trovato, G.K.M. Tobin, and Lars Thørväld. 2018. The Name of the Title is Hope. *J. ACM* 37, 4, Article 111 (August 2018), 1 page. <https://doi.org/10.1145/1122445.1122456>

## 1 INTRODUCTION

ACM’s consolidated article template, introduced in 2017, provides a consistent  $\text{\LaTeX}$  style for use across ACM publications, and incorporates accessibility and metadata-extraction functionality necessary for future Digital Library endeavors. Numerous ACM and SIG-specific  $\text{\LaTeX}$  templates have been examined, and their unique features incorporated into this single new template.

If you are new to publishing with ACM, this document is a valuable guide to the process of preparing your work for publication. If you have published with ACM before, this document provides insight and instruction into more recent changes to the article template.

The “acmart” document class can be used to prepare articles for any ACM publication — conference or journal, and for any stage of publication, from review to final “camera-ready” copy, to the author’s own version, with *very* few changes to the source.
